FEATURE IN FOCUS

Project Management

COLLABORATION

This complex structural transformation required airtight organization, which Business Pilot managed from a single dashboard. The platform centralized every moving part of the build, allowing the team to effortlessly coordinate custom Sheerline orders, track incoming supplier deliveries, and align installation crews to keep the project moving seamlessly.

BRIEF

The homeowners wanted to transform an existing cold conservatory and felted flat roof into a comfortable, year-round room with a seamless ceiling. They wished to keep their existing window frames but completely upgrade the overhead structure to create a bright, premium orangery living space.

THE CHALLENGE

The build presented a strict height restriction on the existing flat roof. To overcome this, the team had to completely remove the old roof, take down the dividing steel beam, and modify the brickwork above, all while precisely retrofitting the new structure to the retained frames.

“ Business Pilot gave us complete project management across bespoke orders and team scheduling. How did we manage without it! ”

ERIC KNAPPETT, MANAGING DIRECTOR

PRODUCTS USED

Sheerline Bespoke WarmDeck Flat roof system with two Sheerline S1 Roof Lanterns in Anthracite Grey plus EPDM roof covering.

THE RESULT

The structural retrofit delivered exactly the high-end space the customer wanted. The Sheerline S1 Roof Lanterns flooded the room with natural light, finished beautifully with integrated internal LED lighting and external soffit downlights.
