FEATURE IN FOCUS

Scheduling

PRECISION SCHEDULING

Managing four new builds at various stages required absolute precision. Business Pilot played an important role in helping the team coordinate site communication, track milestones, and manage changing timelines seamlessly. Having a single, live schedule ensured installation teams landed on-site exactly when needed, keeping the multi-property development moving forward without a hitch.

BRIEF

A property developer required a premium glazing partner to deliver a consistent, high end finish across four contemporary new build homes. The vision centered around clean architectural lines, expansive floor to ceiling glazing, and premium aluminium systems to maximize natural light.

THE CHALLENGE

Managing large specification glazing packages alongside an active construction program created major logistical hurdles. With four properties progressing through different build stages simultaneously, installations required meticulous manufacturing coordination and phased deliveries to precisely match evolving site schedules.

“ Business Pilot played an important role in helping us coordinate scheduling ”

PRODUCTS USED

Each property was designed with large floor-to-ceiling glazing elements, combining multiple:

Origin OW-80 windows

Origin OB-36+ bifold doors,

Matching residential entrance and rear doors.

THE RESULT

The completed project delivered four striking contemporary homes utilizing Origin OW-80 windows for slim sightlines and OB-36+ bifold doors to create seamless transitions to the outdoor spaces. Floor to ceiling glazing became a defining feature of the development, flooding the open interiors with light. Through close collaboration and precision scheduling, the entire development achieved a visually unified, premium aesthetic completed right on deadline.
