THAMES VALLEY
WINDOW COMPANY

FEATURE IN FOCUS

Operations

SEAMLESS SCHEDULING

Handling oversized, bespoke glazing elements requires precision coordination across teams, suppliers, and site fitters. By managing operations, project milestones, and diary scheduling inside Business Pilot, Thames Valley Windows maintained total clarity across the entire project lifecycle, ensuring precision delivery, clear fitter coordination, and an on track installation date.

BRIEF

To modernise a Teddington family home with a bespoke architectural glazing package designed to maximise natural light, improve thermal performance and sustainability, and create a fluid connection between the open plan kitchen and the garden.

THE CHALLENGE

Replacing expansive existing openings demanded a system capable of accommodating substantial panel heights and widths while preserving ultra slim sightlines. Crucially, the installation required meticulous planning to ensure structural integrity and flawless performance across wide spans without compromising the contemporary aesthetic.

“

Business Pilot gave us seamless operational control and scheduling to keep this complex installation running perfectly on track.

”

DAN MOYNEHAN, OPERATIONS MANAGER
